---

David,

Here is an small spread sheet that shows values for the County and the towns. The sheet shows 2012 values as compared to estimated 2013 values and the percent of change.

Is this kind of what you are looking for?

Gary

Subject: Increases in different areas

Hey Gary,

I was wondering if it was possible to get an overview of which areas (of both the city and the county, saw the greatest increases and declines in their property tax values. Please let me know what's a good time to talk.

Best,

David Forbes
