Subject: FORD VEHICLES NOTE
Date: Friday, January 29, 2021 8:32:24 AM
Attachments: image001.png

All:
If you are driving a Taurus or an Explorer see below. Leaving the key in the ignition while your issued vehicle is just sitting and you are not working is not a good idea to begin with for any police vehicle, but it also causes a battery drain specifically on the newer Ford vehicles.
DO NOT leave your key in the ignition when it is off and not being driven.
Thanks,

Sgt J.L. Moreau

Subject: Taurus/Exployer KEY LEFT IN THE IGNITION

While checking 2 Ford Taurus for battery drain, Otis discovered that leaving the key in the ignition switch does add to the constant battery drain and will reduce the time the battery will remain charged while engine is not running.
