Officer DeBonis is the only officer with the improper power magazine on Charlie Team. She's been notified to see you about getting the correct one.

Thanks,
Crotty

Subject: Taser Batteries

Hey guys,

I noticed this weekend that some of the new taser batteries are PPM batteries instead of APPM batteries. This means that the PPM batteries do not shut off after 5 seconds if you continue to hold down the trigger on the taser. The APPM batteries make a beeping noise and will automatically shut down after 5 seconds even if you continue to hold down the trigger. I attached a photo of the taser batteries. The way to tell the difference is the APPM will have a sticker on the bottom with a speaker on it.

I would recommend letting your supervisor know what type of battery is in your taser so that they are aware if you have an APPM or not. If you have any questions please let me know.

James "Buddy" Hampton
