I apologize but the training has been moved to December 29 and 30th. Same time and same place.

Thanks

Subject: Signal Box training

I spoke to Vickie Edleman about providing training to our Patrol supervisors on how to switch intersection lights to a flash pattern. This will allow supervisors to utilize stop signs at the intersections if the lights are not operating due to a power outage. The stop signs can only be placed on the side of the intersection where a red light will flash once power is restored.

The training will be held on December 15th and 16th at 1500 hours in the big conference room. This training should only last approximately an hour and you only need to attend one of the training times. This will be mandatory for all Patrol supervisors and is highly recommended for Lt.'s since we cover weekends.

Thanks
