Still waiting. Is there even a feasibility study to be seen?
Thanks-
Jonathan.

What is the status of the feasibility study for making Riverside Drive useable for full-sized 18 wheelers via Craven Street? This feasibility was supposed to be presented to the public this past September.
Thanks-

Mr. Jackson,

A constituent, Mr. Jonathan Wainscott, asked the following on Facebook. I am copying him on this message, so you might help him discern progress. Thank you for your time and attention. - Gordon

Where is the feasibility study for the Riverside Drive grade lowering and turning radius on and off the Craven Street Bridge, Gordon Smith? You have said very specifically in many of the recent forums that you are listenin' and use twitter and facebook to stay abreast of neighborhood concerns. We were told by the city that we'd know whether or not Riverside Drive north could be made to work for 18 wheelers by this past September. Are you going to give us an update?
