Norris,

I've been having several good discussions with Donnie and Jim this weekend about the needs of the arts programs at all our schools. With discussion of building construction and layouts are underway, I would like to provide a document published by the National Association for Music Education (NAfME) regarding the needs pre-K through 12th grade need in order to operate a music program. It is titled "Opportunity-to-learn Standards" and it outlines the facilities and equipment needed for music programs. I encourage you, the contractors, and architects to use this document as a guideline for both Brevard and Rosman.

Another concern, specific to Rosman, I would like to make sure is addressed is the flooding and humidity issues we currently have in the band area. I'm sure this is something that you are aware of, but I hope is specifically being addressed with the new building.

If you have any questions regarding the Opportunity-to-learn standards or the Rosman band area water issues, please do not hesitate to reach out. I would like to see that both Brevard and Rosman receive the music facilities needed for our students to be successful.

Thanks Katerina I'll certainly pass this on to the architects to use in their planning. We hope if the bond passes to have new space for the band programs at both BHS and RHS so keep your fingers crossed 😊

Good afternoon!

I am excited to have you join us in this important planning phase as we move forward with plans for Brevard High, Rosman High, and Rosman Middle! Thank you for your willingness to provide input to the architects and administration as we begin the process of designing innovative and functional facilities that will serve us for the next 40 years.

We currently have plans to meet sometime during the week of April 23rd – the planners will be at your school all day but will need you no more than 1.5 hours of that time. I will give you further details as they become available. If necessary your supervisor will arrange to cover your class time.

Please click on the appropriate link below that gives you an opportunity to share your thoughts about current instructional delivery and how you might picture that taking place in the future. **Please take some time to respond before our meetings begin. Central office staff feel free to complete both**

[RHS-RMS Visioning](#)

[BHS Visioning](#)

We will compile the information and begin to develop facility options around your ideas, so please be deliberate and thoughtful in your answers.

Over the next few weeks and months we will continue to seek input from all stakeholders so we can provide state of the art facilities for our children.

Again I look forward to working with each of you. If you have questions or comments please let me know!

Thanks
