Subject: Concern about fuel sample

Mariate,

Kim Roney here, from Asheville's Multi-Modal Transportation Commission and Transit Committee. I have copied the Mayor and Council members here as some of them have requested me to do so.

I am concerned about an issue I see with maintenance of the bus fleet last year where 7 buses were noted as being out of commission at one time due to fuel issues. Because many of our city vehicles use the same diesel source, I am hoping that you might share information about the fuel test. I am certain communication has taken place to ensure the same issues do not effect our other valuable resources.

Thank you,
Kim
