Yes what's the target time before the COVID 19 at 2:30 or after or do we piggy back on that press conference.

Hi Debra,

Christina just now suggested we address all questions together during a press conference this afternoon. I think this is a sound approach. It will give us time to get our game plan together and we will speak with one voice before all of the media at the same time.
There are some logistics to work out but I think this is a good direction to go in.

Yes I am good with that. I think the Police Chief should be at the forefront since he wasn't last night but I will be right by his side and think the Mayor should be as well. We are contemplating announcing a curfew for tonight.

From WLOS's Stephanie Santostasi:

Will it be possible to speak with the Chief, Mayor and/or City Manager at some point today just debriefing on last night's events/preparing for more tonight?

This is a good opportunity to thank our protesters for remaining peaceful and to call for continued calm in our community.
I think we also a little need time to formulate our approach to whatever happens tonight, have a plan, information to share.

Christina can coordinate with Chief Zack or we could meet the reporter all together to

ensure we speak with once voice.
Thoughts?

Polly
