Subject: Memorial Stadium Track

Hello,

I live in West Asheville, and I am commenting in support of the 6 lane track option for Phase 2 at the Memorial Stadium. This track will give the public accessibility and room to exercise, and would greatly benefit those facing health disparities, especially the predominately African American community near East End and Valley Street. I have looked at the City's documents and see no harm in this option, with the added benefit of an additional space for events (fun runs, charity runs, etc).

Thank You,
Daniel Dean
