Subject: Re: Asheville Primary School on Haywood Road

Thank you for your email Mr. Farkas. I can assure you we understand the sense of community that APS holds for some many parents, students and staff. I am sure the School Board will take this under consideration as they make their decision. Best, Gene Freeman

To whom it may concern,
The status of Asheville Primary School has recently come to my attention, and as a parent of three school aged children, and as someone who works and lives in west asheville, I am writing to voice my support of Asheville Primary School on Haywood road. Schools are one of many positive institutions that enliven and add value to the community on so many levels and Asheville Primary is no exception; providing not only walking access to schooling to surrounding neighborhoods but also adds to the variety of educational styles available to parents in the community, that, combined with the positive influence a school of young people bring to the location specifically make this school one that would be sorely and explicitly missed to all those living and working here in the West Asheville Community.
Thanks so much for taking the time to hear my comments and concerns.
At my best,
Andy Farkas
