

# Christina Booher

architectural designer

## education:

**Master of Architecture** University of North Carolina at Charlotte 2014-2017  
**Bachelor of Science - Business Administration: International Business**  
University of North Carolina at Charlotte 2013-2017

I was born and raised in Asheville, NC. At 18 I took a trip to Barcelona, fell for Gaudi and decided to move to San Francisco, CA. During the 5 years I spent on the West Coast my interest in Architecture grew as I was exposed to a community enriched by and committed to design. I completed a degree in business in 2013 and shortly thereafter applied to graduate school to begin my design education. I am currently a designer in the process of obtaining licensure. My design interests include: innovative construction techniques, refinement of BIM modeling to reflect actual construction techniques, detail design, facade design, parametric design and sustainability.
