Hi Julian,

Thanks for the call today. As discussed, here are some follow up materials from our conversation: Three projects we discussed:

1. Blue Horizons Project:
 1. Timeframe: Ongoing program implemented by community based organizations
 2. Summary: co-funded by the City and County to offer education and programs to residents to reduce their energy usage and power homes with renewable energy
 3. Community Engagement: Working to support DEI within this community supported program through their contract. [REDACTED] they have developed
 4. Next Steps: We have invited you to attend a DEI training they are participating in on Feb 7 at 3pm
2. Less Plastic Asheville:
 1. Timeframe: Limited, 3 month education engagement
 2. Summary: Will provide information and resources via social media and in person tabling events on ways residents can opt to reduce their single-use plastic consumption
 3. Next steps: review [REDACTED]
 4. FYI: Sustainability is working on a metrics spreadsheet for data gathering. Once complete, I will share with you for your input.
3. Climate Resilience Guide Reboot Project
 1. Timeframe: Limited
 2. Summary: Revise [Climate Resilience Resource Guide](#) with learnings from Climate Justice Initiative and with community input.
 3. Next steps: review [REDACTED]

If I forgot anything, let me know. I just sent an invite for another meeting with our team, you and Sala for mid February.

Cheers,
Bridget
